Software Engineer

- **Results-driven Software Engineer with 5+ years of experience** in designing, developing, and optimizing web applications.
- **Proficient in both front-end and back-end development**, with expertise in **Java, Spring Boot, Struts, and Bash**.
- **Experienced in working with both Waterfall and Agile teams**, adapting seamlessly to different development methodologies.
- **Strong problem-solving skills**, with a keen attention to detail and a commitment to writing **highquality, scalable, and efficient code**.
- **Passionate about learning new technologies** and continuously improving system performance. ✉ **Dedicated to delivering user-friendly, maintainable, and high-performance solutions** that align with business objectives.
- **Seeking an opportunity to leverage my skills and experience** in a dynamic and innovative environment.

Education

Bachelor of Computer Science

University of Computer Studies (Thaton)

Final-Year Student

Technical Skills

- **Programming Languages:** JavaSE, JavaEE, Java, JavaScript, C, C++, Bash, C Shell
- **Web Development:** HTML, CSS, jQuery, JSP
- **Frameworks & Libraries:** Spring, Struts 2, Spring Boot, React, Next.js, Node.js, Express.js, Dolphin
- **Databases:** MySQL, Oracle, PostgreSQL , TimeScales Postgres
- **Development Tools:** GitHub, GitLab, SVN, Jenkins , AWS
- **API:** REST API
- **Testing & Debugging:** Skilled in unit testing, debugging, and code optimization across various environments for improved performance
- **Methodologies:** Strong understanding of Agile and Waterfall software development methodologies

AI-Assisted Development

- Cursor AI
- GitHub Copilot
- AI Agent Workflow Design
- Prompt Engineering
- AI Coding Standards & Rule Design
- AI-Driven Software Development Lifecycle

Architecture & Design

- System Architecture Design
- Database Design (ERD)
- Microservice Architecture
- REST API Design

Work Experience

DIR ACE TECHNOLOGY SOFTWARE ENGINEER

2020 –2025

As a **Software Engineer at DIR ACE Technology**, I collaborate with senior team leader and project manager to **design, develop, and maintain Java-based web applications**. My responsibilities involve developing new features, managing application upkeep, optimizing system performance, and ensuring scalability. To uphold high coding standards, I actively participate in **code reviews** and adhere to best practices.

Working closely with the **QA team**, I assist in identifying and resolving software issues, contributing to the timely and successful completion of projects. I utilize **GitLab and SVN for version control** and configure **CI/CD pipelines with Jenkins** to streamline deployments. I also handle updating packages to ensure the code can be deployed all the way to production.

Additionally, I document **technical specifications and system architecture** to enhance project clarity and maintainability. I am also responsible for **managing code deployment**, ensuring stable and high-quality application releases.

LOMTECH GLOBAL – Senior Java Backend Developer

2025 – 2026 Jun

Responsible for leading backend architecture, API design, database modeling, and system implementation for enterprise web applications. Worked closely with project managers, designers, frontend developers, QA teams, and stakeholders to deliver scalable software solutions. Contributed to multiple products including learning management systems, food delivery platforms, and online ticketing systems while utilizing AI-assisted development workflows to accelerate software delivery and improve engineering productivity.

Professional Experience

Programmer– January 2020 to January 2022

- Collaborated with senior developers to design, develop, and maintain Java-based web applications, with a focus on scalability and performance optimization.

- Gained valuable experience from senior developers in areas such as efficient coding practices, debugging, and resolving software defects quickly and accurately.
- Actively participated in discussions with Japan-based clients, contributing to project planning, clarifying client requirements, and ensuring smooth communication throughout the project lifecycle.
- Assisted in code development, learning best practices for writing clean, efficient, and maintainable code.
- Utilized GitLab for version control, streamlining team collaboration and managing the codebase effectively.
- Contributed to technical documentation, improving the transparency and maintainability of project architecture.

Software Engineer– January 2022 to 2025

- Developed and maintained features for Daiwa Securities Group’s online trading platform, collaborating closely with Japanese stakeholders to gather requirements, translate them into technical specifications, and deliver customized solutions.
- Designed and implemented full-stack web applications using Spring Framework, Java SE/EE, and various server-side technologies, including Bash Shell, C Shell, and JobCenter for automated job scheduling.
- Established CI/CD pipelines with GitLab and Jenkins to automate deployment workflows, ensuring smooth and efficient delivery to production environments.
- Conducted unit testing, integration testing, performance testing, scenario testing, non-impact testing, and debugging to ensure high code quality and system reliability.
- Integrated systems using HULFT middleware to facilitate secure and efficient data transfers across platforms.
- Resolved urgent production issues through rapid debugging and troubleshooting, minimizing downtime and ensuring continuous system availability.
- Gained extensive experience in the end-to-end software development lifecycle (SDLC), covering requirement analysis, design, development, deployment, and maintenance.
- Enhanced cross-functional collaboration in a multicultural environment, effectively bridging communication between technical and non-technical teams.

Senior Java Backend Developer / AI-Assisted Full Stack Developer – LOMTECH GLOBAL

2025 – 2026 Jun

- Led the architecture, design, and development of multiple enterprise-grade web applications using Java, Spring Boot, React, Next.js, PostgreSQL, and microservice architecture.
- Designed database schemas (ERD), backend architectures, API specifications, and scalable system structures from project inception to production deployment.

- Developed and maintained microservice and standalone applications for various industries including e-learning, logistics, food delivery, and event ticketing platforms.
- Implemented real-time delivery driver tracking systems for food delivery platforms, including projects for Burger King delivery operations.
- Integrated third-party services and Malaysian payment gateways to support secure online transactions and subscription-based business models.
- Extensively utilized AI-powered development tools including GitHub Copilot and Cursor AI to accelerate software delivery, automate repetitive development tasks, and improve engineering productivity.
- Designed and maintained AI agent workflows, project rules, and development standards that enabled large-scale AI-assisted software development.
- Led fully AI-assisted software development projects, managing the complete software lifecycle from requirement analysis, system architecture, database design, implementation, testing, and deployment.
- Collaborated with AI agents to build production-ready applications while ensuring code quality, maintainability, and business requirement alignment.
- Worked directly with project managers, designers, QA teams, and stakeholders to deliver end-to-end software solutions in Agile environments.

Projects

Project Experience Summary:

Project Overview	Task Division	Architecture	OS	Language	Database/DC	Role	Duration
Share Management System (SMS)	1, 4, 5, 6	Waterfall	Windows	Java	PostgreSQL	1	12/2020 – 04/2021
Access Control Menu: Permission Change	1, 3, 4, 5, 6	Waterfall	Windows	Java	Oracle	1	05/2021 – 08/2021
Information Visibility Enhancement	1, 2, 3, 4, 5, 6	Waterfall	Linux	Bash Shell	-	1	07/2021 – 08/2021
IBS Main Account to NISA Transfer	1, 4, 5, 6	Waterfall	Windows	Java	Oracle	1	08/2021 – 09/2021

IPS Signature Update Work	5	Waterfall	Windows, Linux	Java	Oracle	1, 2	05/2021 – 01/2025
Internet Explorer to Edge	1, 3, 4, 5, 6	Waterfall	Windows	Java	Oracle	1	01/2022 – 05/2022
Project Overview	Task Division	Architecture	OS	Language	Database/DC	Role	Duration
Migration (DOT)							
Screen Development for New Channels	1, 2, 5	Waterfall	Windows	Angular	-	1	04/2022 – 05/2022
FundWrap Online: Integration with Tochigi Bank	1, 3, 4, 5, 6	Waterfall	Windows	Java	Oracle	1	06/2022 – 08/2022
Log Investigation	1	Waterfall	Linux	Bash Shell	-	1, 2	03/2023 – 11/2024
Additional Documents for Report Reissue	1, 3, 4, 5, 6, 7	Waterfall	Windows, Linux	Java, Bash Shell	Oracle	1, 2	04/2023 – 09/2023
Invoice System Compliance (Design to Implementation)	3, 4, 5, 6, 7	Waterfall	Windows, Linux	Java, Bash Shell	Oracle	1, 2	11/2023 – 01/2024
Dividend Payment Electronic Notice Addition	3, 4, 5, 6, 7	Waterfall	Windows, Linux	Java, Bash Shell	Oracle	1, 2	02/2024 – 08/2024
SCOPE Integration Enhancement	1, 4, 5, 6	Waterfall	Windows	Java	Oracle	1,2	06/2024 – 07/2024
SCOPE Full Reporting Compliance	1, 4, 5, 6	Waterfall	Windows	Java	Oracle	1,2	08/2024 – 09/2024
PhoenixDart Online Game machine Shop Platform	1,4,5,6	Agile	Web	Jave (Spring)	Postgres	2,3	04/2025-09/2025

Burger King Delivery Tracking System	1,4,5,6	Agile	Web	Jave (Spring)	Mysql	2,3	10/2025-11/2025
Learning Management System	1,4,5,6	Agile	Web	Jave (Spring)	Postgres	2,3	12/2025-current

Task Divisions:

1. Research & Analysis
2. Basic Design
3. Detailed Design
4. Development
5. Unit Testing
6. Integration Testing
7. Operations
8. Administration
9. Administration & Management
10. Management

Roles:

1. Project Member
2. Project Leader
3. Development Lead

Daiwa Online Trade

As part of the Daiwa Securities Group, I contributed to the development of **Daiwa Online Trade**, a digital trading platform designed to provide seamless and efficient online trading for both individual and institutional investors. The platform offers a range of financial products, including stocks, bonds, ETFs, and mutual funds. My responsibilities included enhancing user experience with a user-friendly interface, integrating real-time market data, and implementing advanced trading tools such as charting, technical analysis, and customizable dashboards. I also focused on ensuring robust security measures for safe transactions and data protection, contributing to a secure and reliable trading environment. For more information, visit [Daiwa Online Trade](#)

Line Pilates Academy

I contributed to the development of **Line Pilates Academy**, an online learning platform that provides professional Pilates training programs for students and instructors. The platform was developed for **HELPERSON GLOBAL SDN.BHD. in Malaysia**, and built by **Lomtech**. It offers structured Pilates courses designed to improve physical rehabilitation, flexibility, and mobility through guided online learning.

The system includes various learning modules such as **Rehabilitation**, **Foundation**, and **Flexibility & Mobility** lectures. It also provides course packages, a study catalog, membership programs, instructor profiles, and a community feature to support interaction among learners. Additionally, the platform integrates promotional features such as discount campaigns (e.g., 10% discount when purchasing multiple courses) to enhance user engagement and course accessibility.

My contributions focused on backend development, including designing and implementing RESTful APIs, managing course and membership data, and ensuring system scalability and performance for online learning services.

For more information, visit: <https://lp-fe.lomtech.net/en>

Omniverse Ticketing Platform (2026)

Role: Solution Architect / Lead Developer

- Independently designed and developed a complete online ticketing ecosystem consisting of:
 - Admin Portal
 - Organizer Portal
 - Customer Portal
- Designed database architecture, backend APIs, business workflows, and system integrations.
- Leveraged AI-assisted development workflows to accelerate implementation while maintaining production-level code quality.
- Delivered the majority of system implementation as a sole developer working alongside AI development tools.

For More information , visit: <https://omnitix-fe.lomtech.net/en>

Line Pilates Academy (Malaysia)

Role: Backend Lead / AI-Assisted Developer

- Designed core database structures and backend architecture for a Malaysian Learning Management System (LMS).
- Implemented course management, membership management, instructor systems, and learning workflows.
- Integrated Malaysian payment gateways and subscription-based payment processing.
- Utilized AI-driven development workflows for rapid feature delivery and system optimization.
- Collaborated with stakeholders to transform business requirements into scalable technical solutions.

Burger King Delivery Tracking System

Role: Backend Developer / Development Lead

- Developed real-time driver location tracking and delivery monitoring systems.
- Designed APIs and backend services for logistics and delivery management.
- Built scalable microservice-based backend components supporting high-volume delivery operations.

Certificate

☐ AWS Academy Cloud Foundation Course
